A strong-willed heiress leads an Expedition to the Amazon Jungle in hopes of finding growth opportunities for her family's empire. Accompanied by professional adventurer Jack Sandusky and a team of well-trained experts, she struggles to balance the responsibility of being in charge of the Expedition with the fact that she herself has no personal experience and must trust her team. She quickly learns the difficulty and the frustration of leading others in such a dangerous venture. Perhaps most frustrating is that fact that Jack Sandusky not only appears know everything that she doesn't, but he also seems to be than impressed with her own potential as a leader or even as a human being. He may be the perfect jungle guide and a professional adventurer, but she is still in charge of the Expedition and the two must work together if they are to complete their mission which will ultimately lead them from the boardroom to the Amazon Jungle and back again.
