Precious Moon is both a heart-wrenching and heart-warming tale of loss and disappearance, escape and discovery, grief and recovery. Set in 1982, an Oxford doctor and British graduate find themselves irresistibly drawn to living in the same remote Andean village in Argentina. While the country is torn apart by its own Dirty War the brief, yet bitter, Falklands War breaks out. Ignoring their government's advice, Alex and Katie refuse to leave the country which has suddenly become both their refuge and the enemy. Friendships are strained and strengthened as the innocent disappear and are exiled, each unexplained loss resonating with Alex and Katie's own tragic pasts. Will the events of the present enable them to come to terms with their own histories, and provide hope for the future?
