Off the grid in the Caribbean, Knight crosses paths with a young woman named Fox, left all alone by her neglectful fiancée. She might be a mirage but she seems perfect. The collateral damages follow him back home to the states where he becomes the target of a vengeful criminal who has just learned of their interlude. Then a mystery caller tracks him down, and brings him in on a plan to respond in kind, by derailing the illicit operations of his newfound nemesis. But when he discovers that he was secretly given the most lethal synthetic drug in existence; he has to travel abroad to find the only antidote, and then settle the score once and for all.
