Jason Bristol, ex-prize fighter and expert animal tracker, and part-time drunk, teams up with beautiful wildlife biologist Norah Phelps as they pursue a man-eating predator that threatens to derail her father's prize real estate development project in north central Idaho. Against the majestic pristine backdrop of Idaho's Bitterroot Wilderness Area, the adventure unfolds. Jason, with Norah's assistance, soon discovers the ghosts of his past are nothing compared to the battle he's undertaken. Smilodon. A saber-toothed cat. He's angry, he's frightened, he's hungry, and he's 12,000 years from home! Smilodon--75,000 words or about 300 pages
