"All we have is time." Saturday night at midnight there was nuclear explosion in Middle America. Everyone for miles around was killed, even Andy Gordon, but that was both the beginning and the end of the longest week of his life. He knows what midnight on Saturday means, but how can he save count lives when no one will listen to him? A theoretical physics grad student named Nora Lehman is the only comfort, and only real help, Andy has in this quick flying adventure of seeming infinite peril set on 'repeat'. Together can they find a way to stop the explosion from happening? Can they save everyone? Can they even save themselves before the clock strikes midnight on Saturday night... again?
