One of the most successful financial books of all time, High Finance on a Low Budget has sold over 250,000 copies in its previous six editions. It shows how anyone can invest like a Wall Street tycoon even if they don't have a huge bank account or make a big salary. The Skousens show how an investor can start with than \$100 and buy investments with great growth potential, such as top-performing stocks, foreign investments, collectibles, precious metals, and even real estate. In this completely updated and revised edition, the Skousens uncover a variety of new investments poised for growth into the late 1990s and beyond. Readers will: -- identify opportunities to achieve 20 to 30% returns on their investments -- discover the huge potential in mining stocks -- learn why penny stocks are safer and more lucrative than ever before -- find out about cutting edge insurance products allowing for stock market investment -- with no risk. As thousands of wage earners, salaried employees, retirees, and cash-poor investors will attest, this financial classic demonstrates how anyone can build real wealth regard of income level and current spending habits.
